Internet

Agree or disagree : The internet has made people more socially isolated.

I disagree that the internet and the mobile phone (= mobile phones) are isolating people. There are two reasons for this.

Firstly, Covid19 has changed our society.
We realized we can communicate with each other using by the internet.
Today a lot of people work and have lessons remotely because people restricted their activities, especially meeting face to face.
It is beneficial for students who are unable to attend school as due to various reasons, including bullying and mental problems before Covid19.

Now, They can take part in online lessons more easily and they do not feel lonely and make positive personal relationships in the internet.

Secondly, by using the internet, the effect on work have gone up, therefore we can have more free time.　Recently we are able to enjoy time with our family and friends and to have helpful social lives

In conclusion, if people use the internet in general and effectively, it will become not to socially isolated. In addition, we will be happy more.
